ABSTRACT
The study brings the fact that how online advertising are used to make any product popular and it also helps to analyze how consumer perceive the online advertising and what are their parameters for purchasing stuff from the online sites. A survey method was used for collecting the data and questionnaire was used as a tool for conducting a survey among 68 respondents who are net savvy.

Keywords: online advertising, ads, product

INTRODUCTION
E-advertising refers to the type of marketing strategy that involves the use of internet for promotion of products by delivering the marketing messages to the larger consumers. Philip Kotler in marketing management millennium edition mention that the internet population is younger, more affluent and better educated and they easily find their way onto the internet, the cyberspace population is becoming more mainstream and diverse.

Online advertising includes email marketing, search engine marketing (SEM), social media marketing, many types of display advertising (including web banner advertising), and mobile advertising. Like other advertising media, online advertising frequently involves a publisher, who integrates advertisements into its online content, and an advertiser, who provides the advertisements to be displayed on the publisher's content. Other potential participants include advertising agencies who help generate and place the ad copy, an ad server which technologically delivers the ad and tracks statistics, and advertising affiliates who do independent promotional work for the advertiser.

RESEARCH METHODOLOGY
Questionnaire was used as a tool for conducting a survey among 68 respondents who are net savvy. For designing questionnaire was designed using google forms. The options in the questionnaire are based on the data collection from the content analysis to study the respondents of netizens towards them. Therefore the graphically presentation has also been derived from the google forms.

DATA ANALYSIS

Graph 1

Do you know about E-advertising?
68 responses

- Yes
- No

98.5%
