### **ABSTRACT:**

Entrepreneurship is understood to be instrumental for economic growth, innovation, productivity and employment. Development of women business visionaries has prompted desired effect in the domain of business. Women business is firmly interwoven with instrumental cultural and financial advantages. Regardless of the way that females comprise almost 50% of the population in India, their investment in innovative exercises which remains seriously restricted. This paper is an endeavor to discuss the idea, and challenges faced by businesswomen in India, it targets investigating the commonness of the problems encountered by women entrepreneurs in India. The female entrepreneurs have to fulfill dual roles but now the dynamic, modern successful women entrepreneurs have proved that they are most suitable to this job.

Business is an area of exploration that has been of gigantic interest to analysts, academicians and strategy creators. Business is altogether related to financial advancement of any economy by speeding up development and success. Over the most recent couple of many years, woman as business visionary is arising both in created and creating economies. It is clear that female business visionaries contribute massively to move along neediness levels, expanded per capita pay and business creation. The subject of orientation hole in business is unavoidable across nations. In practically every one of the nations, there is a wide gap between enterprising exercises across both the sexes. There is likewise a wide gap between pioneering

movement among male and females in Indian setting. This is a humble endeavor to analyze the elements of female business ventures and the challenges they face.

With the rise of women in the field of business venture, analysts have turned to show up at a thorough meaning of women entrepreneur's visionary. Such women analyze the prospect of a new enterprise, ready to take risks, make innovations, create balance between work and home and co-ordinate and lead the organization. Women, who take onus to sort out also deal with the assets of their ventures and bear every one of the dangers in assumptions for determining benefit, can be designated a business woman. This definition depicts female business people as cognizant leaders and chiefs. Women who decided to seek the difficult job of a business person driven by their craving to satisfy their need of autonomy and accomplishment, end up by being successful entrepreneurs. This definition is simply appropriate to women business visionaries who are opportunity driven, for example women who resort to business driven by their freedom of thought. This definition rejects need driven business people who are compelled to seek after business out of some exposed need. Whenever an individual or group of females set out on starting, arranging and dealing with their venture, they are named as a strong visionary. Inventive movement of starting what's more working an undertaking prompting monetary strengthening and social improvement of ladies in the general public can be named as ladies' business. This definition explains the positive, social and monetary commitment of women strong business in the general public. Subsequently it is apparent that the meaning of business visionary can be summed up to women business personas well. A few analysts have characterized woman business visionary having remarkable character qualities, while others keep focus on the parts they play as a business visionary while the Government of India has viewed monetary control as a boundary in characterizing ladies business women. In view of the combination of accessible writing, ladies' business entrepreneurs in Indian setting can be characterized as females having predominant monetary command over their undertaking, who either pick or are driven out of a need to take up the difficult job of a business person and leave towards beginning, sorting out and overseeing assets available to them in assumption for acquiring benefits. Women business people take cognizant choices to deal with their endeavor. As APJ Abdul Kalam said, "Empowering women is a

pre-requisite for creating a good nation, when women are empowered, society with stability is assured. Empowerment of women is essential as their thoughts and value systems lead to the development of a good family, good society and ultimately a good nation.”

Women entrepreneurship in India face many challenges and require radical changes in the mindset of the male dominated society. The modern woman needs to be aware of her potentials, talents and capabilities and her capacity to contribute towards the economic growth and development of the country. Education plays a crucial role in making women more confident and giving them an exposure. It can also help them in getting awareness about different schemes of the govt., World bank and many other such programs. Vocational trainings can help them to get the necessary knowhow about any entrepreneurial venture.

In Indian entrepreneurship, women face plenty of difficulties and challenges. Despite having better entrepreneurial abilities, she lacks confidence and focus on her career goals. Women are considered weak in making quick decisions and risk taking capabilities that hinders them in creating or starting their individual business ventures. Traditional mindset of the patriarchal society is the greatest obstacle as male psyche considers females to be emotional fools and the ones who could be easily duped. Hence it becomes difficult to arrange for the funds and investments to arrange for the raw materials and bear other expenses. Women have to face cut throat competition not only from the industry but also from their male counterparts. They lack networking skills too which makes it difficult for them to survive in this crude world. Besides these, admittance to simple and reasonable money and promoting is distinguished as noticeable test by greater part of their business visionaries. Powerful costs of unrefined components, awkward methods of authorizing and enlistment and rejection from banking and monetary administrations make hindrances for female business visionaries. Business women are regularly tormented with very powerless monetary status attributable to which they are obliged. Absence of social and family participation, and ignorance about different government plans and projects block advancement of womenbusiness. They frequently report difficulties related with monetary, work and showcasing issues. Absence of income and working capital, absence of assembling experience and weight of family

liabilities represent a genuine test to these women entrepreneurs of India .Society renders ladies to be timid, contemplative person and more worried about family commitments. Timidity in business communications, low accomplishment inspiration, hazard unwilling demeanor, lower level of instruction, weight of family commitments, orientation predisposition at the degree of family and society, absence of administrative abilities and experience, absence of business-related data, non-accessibility of money ,social networking are a portion of the difficulties . Challenge of simple and reasonable working capital and value finance, unfortunate advertising support, and infra structural deterrents present unmistakable test to women business venture. A scope of social, individual, promoting, versatility, government support, monetary, creation what's more work-related issues, stress of balance between serious and fun activities and unfortunate specialized ability are accounted for as primary difficulties looked by females business visionaries. Finding some kind of harmony, unfortunate fearlessness, absence of business-related information, bashfulness and hesitance in transactions, absence of formal money because of deficient security, advertising issues, and shortage of business premise are normal difficulties. A portion of the limitations experienced by ladies are selective to them (orientation explicit) while a portion of the limitations are looked by business visionaries independent of orientation. Women entrepreneurs in India, are faced with a wide cluster of difficulties in their professions. Accessibility of adventure and working capital a rise as the top difficulties faced by women business people. Protected and reasonable admittance to business sectors is another worry.

It earnestly shows that nowadays we are dwelling in the 21st century, the support of women in all fields increasingly more uncommonly inside the field of business venture is developing at abroad charge. Women have unlimited potential that needs to be unleashed. Women are aware of the customer needs and that leads to innovations . Women entrepreneurs need attention from not only the society but also from the govt. which includes adaptation of women friendly policies to create home and work balance , tax regulations, allowances, leave provisions etc.to promote them. Women need to break the glass ceilings to come out of their cocoons and become economically independent. A positive environment is required to grasp entrepreneur values. Women empowerment of female entrepreneurs is

necessary for sustainable development and their dedicated involvement in business. Indian sanction is fostering the indistinguishable open door in all areas, indistinguishable freedoms of support in political and same privileges in tutoring and business. Females are 48% of India, however, so the specialists need to offer innovative consideration, direction and ability, improvement programs for females. In this gender it has been really shown that ladies are wonderful advertisers and really like to choose the family, that permits you to keep the family and business in a decent manner. Indeed, however we've appropriate effective ladies' business people in our nation, but others can't fit for gain since male control and our customary practice. These requesting circumstances are looked through lady's advertisers from family and society. There is a pressing need to translate strategy objectives and intercessions that can support a positive climate for female business entrepreneurs in India. Independent India, though, promised equal rights and opportunities of education and employment to women, the benefits reach only to a handful of them. But we can always hope for a brighter and better future for women. As women empowerment comes from participation and control over resources. Entrepreneurship could bring the consciousness about prolonged oppression and capability to resist and seize opportunities. Women Entrepreneurs should always follow Oprah Winfrey's words, 'Think like a queen. A queen is not afraid to fail. Failure is another stepping stone to greatness.'
